

Farmer Automatic

Aviary System

Layer Aviary

The economical layer aviary

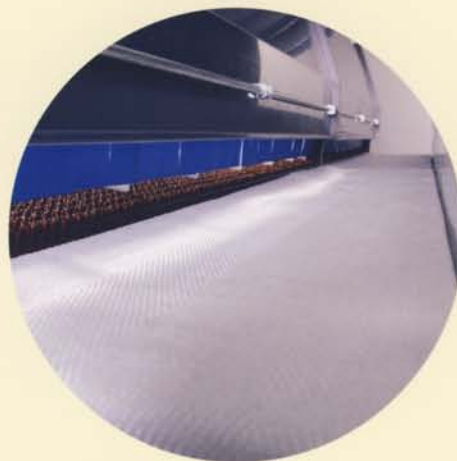

Optimum use of space

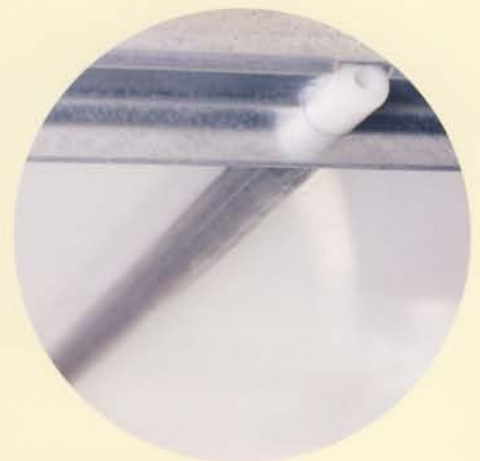

The highly impressive Farmer Automatic Aviary System is the most economical solution of all alternative systems for laying hens. Its combination of different, proven types of aviary and innovative equipment right down to the smallest detail ensures optimum use of space.

Used worldwide:
the unique Farmer Automatic chain
feeding system

An integral part of the nest:
the egg collection belts

Safe and hygienic:
manure removal by means of manure
belts on rollers

Automatic feeding system

The proven Farmer Automatic chain feeding system is easy and reliable to handle and use. Long-lasting and wear-resistant, it ensures feed is distributed evenly and quickly with reduced feed loss and low energy requirements.

Automatic egg collection

The egg collection belts are an integral part of the nesting boxes and automatically transport eggs away from the birds' reach and straight to a collection table or elevator, or alternatively straight to a packer or grading machine via a connected Farmer Automatic egg cross conveyor.

Automatic manure removal

Safe, problem-free and regular manure removal is guaranteed even in long poultry houses by polypropylene manure belts travelling on rollers. At the end of the row of aviaries the manure falls into a manure cross conveyor. The total solution reduces ammonia build-up and fly infestations for a cleaner environment.

Advantages at a glance

- Flexible housing for optimum use of space
- Plastic-coated floor mesh
- Highly wear-resistant chain feeding system
- Special system lighting for fewer out of nest eggs
- Cover over the egg channel protects eggs laid within the system
- Integrated nest boxes
- Optional manure drying
- Manure belts switch off individually
- Manure removal by means of belts on easy-running manure belt rollers
- Longer manure belts available
- Automatic egg collection
